

I'm Safe on **PrEP**

Social Media Toolkit

Campaign Introduction

I'm Safe on PrEP is a social marketing campaign, funded by Hamilton County Public Health, which launched June, 2023. The goal is to increase knowledge of PrEP (Pre-Exposure Prophylaxis) and establish it as a viable, trusted means of HIV prevention.

Social Media Posting

To boost awareness of the campaign, please share the branded materials made available in this toolkit and on our website (www.tryprep.org) on your social media channels (*Facebook, Instagram, & Twitter*):

Copy, paste, and share any or all the following:

1. DYK there is medication that provides up to 99% protection from HIV? It's called PrEP (short for Pre-Exposure Prophylaxis), and it's for people who are HIV negative. Find out more about PrEP and whether it might be right for you: www.tryprep.org. Everyone deserves access to PrEP. #TryPrEP
2. How safe is PrEP? Very safe AND effective. While some people experience minor side effects like nausea, most people don't. This medication can prevent HIV through sex or intravenous drug use. PrEP can be a lifesaver for sexually active folks who get caught up in the moment: www.tryprep.org. #TryPrEP
3. PrEP is covered by Medicaid and most private insurance plans. PrEP care includes medication, medical appointments, and relevant lab tests. Please visit the Resources section of the #TryPrEP website for PrEP navigators who can help you access financial assistance: www.tryprep.org.
4. You have the power to protect yourself from HIV, with PrEP. Take this pill once a day. Talk with your health care provider to learn more about how it works. Find out more at www.tryprep.org. #TryPrEP
5. Do you take PrEP? Help us let people know how PrEP prevents HIV. Share a selfie OR a video and in the caption, use the hashtag #TryPrEP. Taking care of your sexual health is one of the best things you can do for yourself and your community – there's power, peace, and pleasure in that: www.tryprep.org. #TryPrEP
6. Worried that you could be exposed to HIV during sex? Get to know more about PrEP, how you can access it, and how it works to keep you HIV negative: www.tryprep.org. #TryPrEP
7. PrEP facts:
 - PrEP prevents the spread of HIV through sex by up to 99%, which means that you can have sexual connections with people living with HIV, without worrying about getting the virus.
 - PrEP only protects you from HIV – not from other STIs (sexually transmitted infections) like gonorrhea, chlamydia, or syphilis.
 - Using PrEP and condoms together provides protection from HIV and most STIs. Learn more about PrEP and HIV Prevention: www.tryprep.org. #TryPrEP
8. PrEP is safe for Trans women and men because there are no known drug conflicts between PrEP and hormone therapy. If you're still concerned, that's understandable. Consult your health care provider about checking your hormone levels. Get more info about HIV prevention at www.tryprep.org. #TryPrEP
9. If you don't know your HIV status, get tested. If you're HIV negative, PrEP will help you stay that way: www.tryprep.org. #TryPrEP – Side note: If you test positive for HIV, don't worry, there's medication to keep you healthy. Real talk.
10. Feel good, feel empowered, feel secure in your sexual health choices. Find out more about PrEP, the pill that provides up to 99% protection from HIV: www.tryprep.org. The choice is yours to have the kind of sex you want, with whomever you choose! #TryPrEP
